

REDUCED TAP FEES FOR FEMA TRAILERS

At their meeting on December 16, 2008, the District's Board of Directors approved a reduced tap fee for FEMA trailers. Anyone that will be placing a FEMA trailer on property that does not have a water meter can receive a meter at the reduced price of \$475. The normal price for a residential tap is \$950.

Customers have until March 31, 2009 to receive the reduced tap fee. A deposit of \$150, application fee of \$75, and customer service fee of \$25 will also apply. Anyone obtaining a FEMA trailer that is interested in receiving the reduced tap fee should request it at the time they apply for service.

Customers that already have a meter at the location they will place the FEMA trailer are not required to pay for another tap. However, only one FEMA trailer may use any existing tap.

For more information please call the District office at (409) 296-3475.
