OR YOU WILL NOT BE PERMITTED TO CROSS.***

**CUSTOMER SERVICE INSPECTIONS**

All customers will be required to have a customer service inspection performed at their service location with sixty (60) days of service restoration. This is a State requirement that requires us to ensure that no lead solder is used in plumbing and that proper backflow prevention devices are in place where needed. For most residential customers, an atmospheric vacuum breaker (AVB) is required on each hose bib to prevent backflow to the water system. AVB's can be purchased at any hardware store and they are available at the District office for \$4.00 each. Please ensure that an AVB is installed on every hose bib at your home before the inspection is scheduled. After service is restored to your home, you will be contacted by District personnel to schedule the inspection. Inspections will be performed every Thursday and Friday of the week. After the inspection is performed, you will be billed \$50 for the inspection fee.

**REPORTING WATER LEAKS**

As we work to restore water service, valves are cracked open in areas and leaks are repaired. Should you see a water leak, please call the District office at (409) 296-3475. Signs with the District telephone number are located near the check point at Rollover Pass and near the District office in Crystal Beach. The District has a 24 hour answering service that will take a message and dispatch the information to District personnel. Your help in reporting leaks is appreciated!

**FILL STATIONS**

The District plans to open fill stations for residents that have not yet had water service restored to their homes next week. Information regarding the locations and times for filling will be posted soon.

**METER LOCATIONS**

**WE NEED YOUR HELP!** If you know where your water meter was located, please mark the location with a flag or sign. Flags are available in a bucket near the front door at the District office in Winnie and in a bucket near the front door at the District's damaged office in Crystal Beach. Marking your meter location will greatly assist us in ensuring water service is turned off to your home prior to restoration of the water system in your area. We will not be able to turn water service on to a street before all meters are located and turned off.
